REPLY TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In complete response to the Office Communication mailed on January 26, 2006 whereby the Examiner has required restriction amongst the claims, applicant hereby elects, with traverse, Group VI – claim 9 – which as stated in the Office Communication is "drawn to a method for controlling water and electrolyte balance and acid-base equilibrium of a patient under operation or post-operative patient." OFFICE COMMUNICATION at 2-3.

According to section 803 of the M.P.E.P., a restriction between patentably distinct inventions is proper only where there is a serious burden on the examiner to examine all the claims in a single application. This is true even when appropriate reasons exist for a restriction requirement. While applicant does not concede that proper reasons exist for a restriction requirement (*i.e.*, whether two or more independent and distinct inventions are claimed), there is no serious burden on the Examiner to examine all of the claims in the present application particularly since the

searches are co-extensive. Accordingly, the restriction requirement is in error and should be withdrawn.

The merits of the Examiner's unsupported statement regarding the "nonallowance of the linking claims, claims 1-3" will be addressed at such later time when the Examiner actually sets forth the basis and reasoning behind such assertions.

Moreover, the Examiner's attention is directed to the fact that applicants filed a Preliminary Amendment when the application was filed on September 22, 2003. This Preliminary Amendment does not appear to have been taken into account when the Examiner issued the Office Communication requiring restriction. This is evident by the fact that the Preliminary Amendment added new claim 15 which was not included in the Office Action Summary nor the restriction requirement itself. Based solely on the structure of the Examiner's restriction requirement, it would appear that claim 15 would be considered a linking claim.¹ If, however, the Examiner considers claim 15 (or any of the other claims which were amended via the Preliminary Amendment) to be grouped differently, then the Examiner must withdraw the current restriction requirement and, if applicable, re-issue the restriction requirement so as to permit applicant a fair and full opportunity to evaluate the new requirement and make a new election.

Applicant reserves the right to file one or more divisional applications directed to any of the non-elected subject matter

In the event that there are any questions relating to this Reply to Restriction Requirement, or the application in general, it would be appreciated if the Examiner

¹ This statement should in no way be construed as any type of admission with respect to the allowability of claim 15.

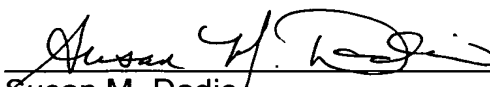

would contact the undersigned attorney at concerning such questions so that
prosecute of this application may be expedited.
